PART 3: Seven Well-being Goals

Future Generations framework for projects

Based on the well-being of Future Generations act

The Well-being of Future Generations (Wales) Act requires each public body to carry out sustainable development by setting (and publishing) well-being objectives designed to maximise contribution to achieving each of the well-being goals. Public Services Boards (PSBs) must also assess the state of well-being in its area, set local well-being objectives in its local well-being Plan, to maximise the PSBs contribution to achieving the well-being goals. It may be that the well-being objectives set out in (PSBs) local well-being plans are the same objectives that individual public bodies decide to adopt. The Guidance on the Framework explains its purpose and how it should be used.
Well-being Objectives

(Public Bodies and Public Services Boards)

Check to see if there is a connection between your project/proposed activity and the relevant Public Bodies and/or Public Services Board’s Well-being Objectives and Plans – if relevant, consider the section below to ensure it can make a positive contribution, if not relevant check to ensure that your proposed activity does not conflict or work against the Well-being Objectives.
PART 1: Well-being Objectives (Public Services Boards)

Local Well-being

Initial project development

Start designing your project from an understanding of the well-being of your area:

- How does your project address issues identified in the local well-being assessment of the area?
- Where will the project be located? What does the well-being assessment of the area say about the location?
- Identify the relevant connections with the local well-being plan – how will your project support this, the local well-being objectives and the steps to meet the objectives?

Review of the project

Return to the issues you identified in the local well-being plan:

- How can you maximise the contribution of your project to the well-being of the local area and contribute to the delivery of the local well-being plan?
- Dig further - are there other things the project could contribute to in order to improve the economic, social, environmental and cultural well-being of Wales? (Looking at the seven goals will help you to do this - see the table on goals below).

Local well-being objectives

Consider each of your local well-being objectives and describe how your project could support / contribute to these.

How can you ensure that:

- Your project can positively contribute to the objectives
- Your project does not undermine such objectives

If your project could have an impact on older people, children or people with protected characteristics, there is further guidance available from the Older People's Commissioner, Children's Commissioner and Equalities and Human Rights Commission.

Older People's Commissioner
Children's Commissioner
Equalities and Human Rights Commission

Return to your local well-being objectives, and ensure that you have considered how you can maximise the contribution of your project to the relevant objectives, and in turn the seven well-being goals.
<table>
<thead>
<tr>
<th>Public Body’s Objectives</th>
<th>Initial project development</th>
<th>Review of the project</th>
</tr>
</thead>
</table>
| Consider each well-being objective in turn | Identify which objectives are directly relevant to your project.  
- What are the main elements of the objectives relevant to your project, and how will your project support these?  
**How can you ensure that:**  
- Your project can positively contribute to the objectives (the duty is to take ‘all reasonable steps’ to meet these objective)  
- Your project does not undermine such objectives  
Identify any overlaps with the local well-being objectives of the PSB (above) - going through the five Ways of Working (see Table below) will also help you with this. | Return to your well-being objectives, and ensure that you have considered how you could maximise the contribution of your project to the relevant objectives, and in turn the seven well-being goals. |
Five Ways of Working

Using the Five Ways of Working is a key element of the legislation. They must be used throughout the life time of a project, from design to review.
Part 2: Five Ways of Working

Ways of Working

Initial project development

Start designing your project from an understanding of how Wales might be different several generations from now, and what your long-term vision is (referring back to the goals).

- Identify the long-term, future trends and scenarios, challenges and opportunities that are most relevant to your project. These might be social, economic/political, environmental, cultural or technological and include known (e.g. ageing population, depleting natural resources), and those with a higher level of uncertainty (e.g. jobs and skills needed in the future). You may want to consider techniques such as back-casting, foresight and horizon scanning.

- How do these trends affect your project, and what impact could your project have on these trends?
- How does your project mitigate, facilitate or make the most of these trends?
- How can you embrace long-term opportunities, recognising potential short-term needs? (You have to use the five Ways of Working to resolve potential conflicts)

Review of the project

Return to the trends you identified initially.

Consider how realistic the underlying assumptions are about future trends:

- If these assumptions are found to be incorrect – how useful is your project in addressing future challenges in Wales?

Consider how sustainable the project will be over its lifespan:

- How does the project support long-term well-being of people in Wales?
- Will the project be self-sustaining, or require significant additional or different resources?

Consider what will happen to the project at the end of its proposed lifespan:

- Can the materials be reclaimed / re-used / re-purposed?
- Can capacity be retained?

Long-term:

The importance of balancing short-term needs with the need to safeguard the ability to also meet long-term needs.
### Prevention:
prevent problems occurring or getting worse may help public bodies meet their objectives.

<table>
<thead>
<tr>
<th>Ways of Working</th>
<th>Initial project development</th>
<th>Review of the project</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Start from a broad consideration of the types of problem that your project could help prevent in the future e.g. social, economic, cultural, environmental or something specific. What are the root causes that your project could help to address? How does your project support the breaking of negative cycles and/or intergenerational challenges such as poverty, poor health, environmental damage and loss of biodiversity? Refer to the local well-being assessments. How could your project minimise its own negative impacts e.g. minimising waste and resource use, emissions and air quality, social / community cohesion?</td>
<td>Return to the problems and negative cycles that you identified that your project could address. Consider the assumptions underlying your project:  - Is your project reliant on other interventions being in place to address the causes of long-term cycles alongside your project?  - What are the conflicts emerging between different aspects of well-being and sustainability and how are these being resolved?</td>
</tr>
</tbody>
</table>
### Integration:

considering how public bodies' well-being objectives may impact upon each of the well-being goals, on their other objectives, or on the objectives of other public bodies.

**Ways of Working**

**Initial project development**

Start by considering how your project aims could impact on your organisation's well-being objectives and other public bodies well-being objectives and local well-being plans (see Part 1 above).

- How does your project address issues identified in the relevant Assessment of Local Well-being (produced by the local PSB) and/or Well-being Plan (see Part 1 above)?

- Do you understand the other duties and policies at local and national level which may have relevance to your project? How could your project connect different public policy / strategic agendas, to break down silo-working and generate co-benefits e.g. how can a transport project support improvements in health, culture, worklessness. How can your project support other duties including for example the Public Sector Equality Duty, UN Convention on the Rights of the Child (CRC), Welsh Language Standards?

**Further guidance, e.g. Toolkit on WFGA and UNCRC commitment from Children’s Commissioner, is available on**

- **Children’s Commissioner**
- **Equalities and Human Rights Commission**
- **Welsh Language Commissioner**
- **Older People’s Commissioner**

- What practical steps will you take to integrate your project with existing plans and strategies of other public bodies to maximise the project’s contribution across the seven well-being goals?

- Consider each of the seven well-being goals and identify any risks of negatively impacting on other public bodies well-being objectives (noting likelihood of negative impacts accumulating over time). Repeat the exercise looking for the positive impacts and the potential for multiple benefits (Part 3 below on Goals will assist you further).

---

**Review of the project**

Return to how your project integrates with other public bodies well-being objectives.

Consider the projects impact on the seven well-being goals (Part 3 below will help you to do this):

- Which of the well-being goals does your project directly contribute to?

- How can your project maximise its contribution to all of the goals by aligning with relevant public body strategies and well-being objectives?

- What measures are in place to ensure that the project continues to positively contribute to the well-being goals throughout its life?
**Initial project development**

Start by considering who are the key stakeholders from a range of related sectors and disciplines who could support the development of this project.

- Identify these key stakeholders early so that collaboration can be productive and meaningful.
- Does your range of stakeholders include public, private and third sector organisations as well as some ‘unusual suspects’ who may be able to bring ideas and solutions to the table which you hadn’t thought about?
- How will key stakeholders be involved in supporting the development of the project, and at which stage of the project?

---

**Review of the project**

Return to your key stakeholder list.

- Which groups/bodies have you identified who are working towards similar goals around sustainability and well-being?
- What mechanisms are in place to ensure this collaboration is effective?
- How will you ensure that collaboration continues through the life of the project?

---

**Collaboration:**

**acting in collaboration with any other person (or different parts of the body itself) that could help the body meet its well-being objectives.**
<table>
<thead>
<tr>
<th>Ways of Working</th>
<th>Initial project development</th>
<th>Review of the project</th>
</tr>
</thead>
</table>
| **Involvement:** the importance of involving people with an interest in achieving the well-being goals, and ensuring that those people reflect the diversity of the area which the body serves. | Start by considering how well you understand the needs, and lived experiences, of citizens who will be affected by this project, and how you will use this to inform consideration of the need for the project. Consider which methods you might use for drawing on lived experiences and who might be able to help with this. Participation Cymru’s National Principles for Public Engagement is a good starting point.  
   - Consider how you will engage stakeholders with different forms of expertise, knowledge and backgrounds, including how you will understand the needs of the broader population and those not represented by specific interest groups.  
   - How well do you understand the needs and challenges of people in the area? Well-being Assessments will give some insight.  
   - Identify the key stakeholders affected directly and indirectly by the project. How will stakeholders be involved in the identification of the need for this project, and how will it be informed by their needs?  
   - How will key stakeholders be involved in the design and development of the project?  
   - How will key stakeholders be involved in the delivery and / or oversight of this project? | Return to how your project will involve citizens and stakeholders:  
   - How has the project been shaped by key stakeholders affected by the project, and particularly their needs and challenges?  
   - How will key stakeholders affected by the project continue to influence the project throughout its life? |
Seven Well-being Goals

The well-being goals must be considered as an integrated set of seven, and the well-being objectives (considered above) should maximise contribution to all seven.
### Prosperous

**Aspect of the Act/ Definition**

An innovative, productive and low-carbon society which recognises the limits of the global environment and therefore uses resources efficiently and proportionately (including acting on climate change); and which develops a skilled and well-educated population in an economy which generates wealth and provides employment opportunities, allowing people to take advantage of the wealth generated through securing decent work.

**Examples of key elements of Act**

In working towards an **innovative Wales** we should be thinking of one with a **thriving new business sector, supporting social innovation and entrepreneurs.**

Consider how innovation can be used to tackle social determinants of poor health, growing businesses in areas that have suffered economic decline, and opportunities for green growth across Wales.

In working towards a **productive Wales** we should be thinking of one which is creating goods and providing services to meet its own needs, as well developing strong export markets.

Consider environmental sustainability, social and cultural well-being.

**Related areas of well-being, to support integration**

The social determinants of poor health;

Growing businesses in areas that have suffered economic decline;

Opportunities for green growth across Wales.

Environmental sustainability and green growth;

Supporting resilient local communities and economies.

**Meeting the Act at a strategic level**

How will this project push infrastructure provision in a more sustainable, innovative direction?

How will this project open up opportunities for new business sectors and production of public goods?

How will it support the growth of local supply chains and low-carbon business sectors?

How will the project address current needs as well as recognising future generations needs?

**Designing your proposal to support the intentions of the Act**

How will this project innovate to meet the challenges, and take advantage of the opportunities, set by the relevant trends identified when thinking about the ‘long-term’ in the Ways of Working?

Is your project modular, and could it be adapted to a changed Wales in future?

If this project could have negative impacts on parts of the local economy (e.g. reduced costs of transporting goods damaging viability of local supply chain) how could you think about resolving any potential conflicts?
Prosperous: An innovative, productive and low-carbon society which recognises the limits of the global environment and therefore uses resources efficiently and proportionately (including acting on climate change); and which develops a skilled and well-educated population in an economy which generates wealth and provides employment opportunities, allowing people to take advantage of the wealth generated through securing decent work.

In working towards a Wales which uses resources effectively and proportionately we should be thinking of one which builds efficiency into design (e.g. lowering embedded carbon; building energy efficiency into design) and prioritises strategic use of globally limited resources.

Consider how you will reduce Wales’ ecological footprint and source materials locally. Also consider how you can work with other public bodies in pursuit of shared goals to allocate resources most efficiently.

Prosperous continued...

Moving towards a low-carbon in Wales could mean an economy driven by green growth, and supports people to live low-carbon lifestyles.

Consider the need for skills development, innovation, and employment.

Need for skills development and employment;
Innovative economy, agile and able to adapt to future change.

How will this project encourage industry and government to shift towards low-carbon and green economic growth?

What behaviours does this project encourage or discourage? e.g. does it encourage private car use? Does it increase local provision of services? Does it support an economy where jobs are located where people live, rather than just in bigger cities? Does it encourage people and businesses to buy local?

How will this project help or impede people to live low-carbon lifestyles? e.g. improving access to public transport access, increasing the supply of local renewable energy and reducing the carbon footprint of homes and buildings?

In a context where financial, ecological, and material resources are finite, does this project offer a responsible solution to the problems posed?
Have less resource-intensive alternatives been looked at, and if so what does this approach offer over and above them?

How will the design of this project use resources efficiently and proportionately?

For example:

- How will it integrate low-carbon production techniques and reduce the embedded carbon in materials used?
- How will it minimise the use of finite resources?
- How will it maximise use of local resources and supply chains?
- How will it minimise waste and its impact?

Organisations such as Constructing Excellence Wales will have guidance and advice.
### Part 3: Seven Well-being Goals

#### Prosperous:

**An innovative, productive and low-carbon society which recognises the limits of the global environment and therefore uses resources efficiently and proportionately (including acting on climate change); and which develops a skilled and well-educated population in an economy which generates wealth and provides employment opportunities, allowing people to take advantage of the wealth generated through securing decent work.**

<table>
<thead>
<tr>
<th><strong>In working towards prospering employment in Wales</strong> we should be thinking of <strong>reducing unemployment and underemployment as well as ensuring that new jobs created are good quality jobs.</strong></th>
<th><strong>Role of employment in reducing inequality; need to develop jobs in low-carbon industries; how might you collaborate with other skills/education bodies in Wales.</strong></th>
<th><strong>How will your project create long-term, sustainable jobs?</strong></th>
<th><strong>Are you creating jobs in places with high levels of unemployment and underemployment?</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Consider the role of employment in reducing inequality, the need to develop jobs in low-carbon industries, and how you might collaborate with other skills/education bodies in Wales.</td>
<td></td>
<td></td>
<td>To what extent are you creating jobs that are: offering decent hours and pay; satisfying with opportunity for progression; secure and accessible to people of all ages and backgrounds?</td>
</tr>
</tbody>
</table>

#### Skilled and well-educated Wales

**In working towards a skilled and well-educated Wales we should be thinking of investments which both create opportunities for individuals and which develop a resilient and flexible workforce.**

<table>
<thead>
<tr>
<th>In working towards a skilled and well-educated Wales we should be thinking of investments which both create opportunities for individuals and which develop a resilient and flexible workforce.</th>
<th>Low-carbon economy; a more equal spread of economic activity across the country; how might you collaborate with other skills/education bodies as well as the private sector in Wales.</th>
<th>How will your project provide training that will develop skills and knowledge which the Welsh labour market needs now and in the future?</th>
<th>Will training delivered in your project change people’s labour market position in a lasting way, putting them in a stronger position for other jobs when the project ends?</th>
</tr>
</thead>
</table>
| Consider the development of a low-carbon economy, a more equal spread of economic activity across the country, and how you might collaborate with other skills/education bodies in Wales. | | For example:  
- How will it embed lasting opportunities for skills development?  
- How will it widen accessibility of educational institutions? | |
### Resilient

A nation which maintains and enhances a biodiverse natural environment with healthy functioning ecosystems that support social, economic and ecological resilience and the capacity to adapt to change (for example climate change).

In working towards a Resilient nation we should be thinking of **ecosystems which support social resilience and community well-being**, by offering opportunities for people to enjoy nature, share outdoor space, and strengthen social ties with their communities.

Consider the importance of heritage and access to recreation, and the restorative health effects of access to nature, and the importance of cohesive communities.

In working towards a Resilient nation we should be thinking of **ecosystems which support economic resilience**, to protect and enhance opportunities for people to work and produce in a sustainable way.

Consider the importance of building sustainable employment in rural and coastal communities to tackle regional inequalities and maintain viable productive non-urban communities where local people can prosper.

<table>
<thead>
<tr>
<th>Aspect of the Act/ definition</th>
<th>Examples of key elements of Act</th>
<th>Related areas of well-being, to support integration</th>
<th>Meeting the Act at a strategic level</th>
<th>Designing your proposal to support the intentions of the Act</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resilient</td>
<td>In working towards a Resilient nation we should be thinking of <strong>ecosystems which support social resilience and community well-being</strong>, by offering opportunities for people to enjoy nature, share outdoor space, and strengthen social ties with their communities.</td>
<td>Importance of heritage and access to recreation; restorative health effects of access to nature; importance of cohesive communities.</td>
<td>How will your project enhance or reduce access to, and quality of, green and open spaces?</td>
<td>How do the green/open spaces near your project currently help communities come together and bond? How will your project build on these benefits? Could your project include green infrastructure?</td>
</tr>
<tr>
<td></td>
<td>Consider the importance of heritage and access to recreation, and the restorative health effects of access to nature, and the importance of cohesive communities.</td>
<td></td>
<td></td>
<td>What else could you do to support social resilience and community well-being?</td>
</tr>
<tr>
<td></td>
<td>In working towards a Resilient nation we should be thinking of <strong>ecosystems which support economic resilience</strong>, to protect and enhance opportunities for people to work and produce in a sustainable way.</td>
<td>Building sustainable employment in rural and coastal communities to tackle regional inequalities; maintain viable productive non-urban communities where local people can prosper.</td>
<td>How will this project build on and unlock opportunities for green growth across Wales?</td>
<td>How will your project protect and enhance ecosystems which support economic activity in Wales?</td>
</tr>
<tr>
<td></td>
<td>Consider the importance of building sustainable employment in rural and coastal communities to tackle regional inequalities and maintain viable productive non-urban communities where local people can prosper.</td>
<td>How will this project support economic resilience in rural Wales e.g. in the agriculture sector?</td>
<td>For example:</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• How will it impact opportunities for employment in wildlife and conservation? • How will it impact / how could it improve livelihoods in rural communities for people of all ages and backgrounds e.g. quality of coastlines and beaches, and agricultural resources e.g. soil, pollination, regulated drainage?</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
**Resilient:**

*A nation which maintains and enhances a biodiverse natural environment with healthy functioning ecosystems that support social, economic and ecological resilience and the capacity to adapt to change (for example climate change).*

In working towards a Resilient nation we should be thinking of ecosystems which support ecological resilience, making the Welsh environment more self-sustaining, and enables Wales to adapt better to changes such as climate change.

Consider options to be adaptive to a changing environment/climate, future environmental trends and to use resources efficiently and proportionately.

Need to adapt to future environmental trends (e.g. climate change); and to use resources efficiently and proportionately.

How will this project develop innovative solutions for infrastructure provision which prioritises environmental resilience and green infrastructure?

[This Green Infrastructure Guide will help you to consider all seven well-being goals](#)

How will this project integrate the ‘precautionary principle’ where environmental trends and impacts on ecosystems are unknown?

How will your project enhance biodiversity (a duty under the Environment (Wales) Act 2016), promoting principles of Sustainable Management of Natural Resources (SMNR)?

How will your project directly impact ecosystems?

**For example:**

- Will it disturb important breeding grounds or animal migration routes? Does it cut through any sites of designated environmental significance?

- How will your project add to the health, reach, and size of population that ecosystems can support? e.g. protecting areas of wildlife and investing in green infrastructure.

- How will your project indirectly impact nearby ecosystems? For example: Will it increase light pollution, damaging nearby owls’ ability to hunt?

- Will replanting a forest elsewhere replace the services provided by a more mature forest?

- Will your project push ecosystems over a threshold beyond which they are at risk of collapsing?

How will this project help Wales adapt to climate change, for example the effects of increased flooding and severe weather events?

[The Climate Change Risk Assessment 2017 has relevant data and evidence](#)
### Healthier

A society in which people’s physical and mental well-being is maximised and in which choices and behaviours that benefit future health are understood.

<table>
<thead>
<tr>
<th>Aspect of the Act/ definition</th>
<th>Examples of key elements of Act</th>
<th>Related areas of well-being, to support integration</th>
<th>Meeting the Act at a strategic level</th>
<th>Designing your proposal to support the intentions of the Act</th>
</tr>
</thead>
<tbody>
<tr>
<td>In working towards a <strong>healthier Wales</strong> we should be thinking of how we <strong>use our understanding of the social, economic, environmental and cultural determinants of mental and physical health and well-being</strong> to change the decision we make.</td>
<td>Unequal distribution of environmental problems such as noise and air pollution and the social impacts these have; Health trends linked to future changes in the environment (e.g. extreme weather); Importance of broader factors to physical and mental health and well-being; such as connectedness, good jobs, access to opportunities and services.</td>
<td>How will this project address the determinants of mental and physical health and well-being of people of all ages?</td>
<td>How will your project impact air quality? How will these changes be distributed between different areas, enhancing or reducing health inequalities? How will this project affect local mental health, both during the construction phase and afterwards in its everyday functioning, for example increasing stress and anxiety of people living locally? How will this project address the social, economic, environmental and cultural determinants of health and well-being, thereby preventing ill health? Consider how your project could be informed by evidence from sources such as the Public Health Outcomes Framework:</td>
<td></td>
</tr>
</tbody>
</table>
### Healthier:

A society in which people’s physical and mental well-being is maximised and in which choices and behaviours that benefit future health are understood.

In working towards a **healthier Wales** we should be thinking of how we need to develop the infrastructure that enables people to make healthier choices.

Consider income inequalities and the need for low-carbon supply chains in food production. Also consider public bodies who are working on reducing health inequalities.

| Income inequalities; need for low-carbon supply chains in food production; public bodies who are working on reducing health inequalities; provision of healthy food; opportunities for exercise and active travel. |
| How will this project encourage or discourage people of all ages and backgrounds to make healthier choices and behaviours? |
| How will this project protect and improve local access to quality outdoor spaces for revival, restoration and exercise? For example, adding new public pathways, existing cycling, walking and riding trails, clean beaches and other opportunities for outdoor recreation e.g. running, swimming. |
| How will this project create and impact opportunities for exercise and active travel? |
| How will this project impact local supply chains to improve affordable access to sustainable, healthy, fresh produce? |
| How will this project enable the understanding and/or provision of healthy food options? |
### More equal:

A society that enables people to fulfil their potential no matter what their background or circumstances (including their socio-economic background and circumstances).

<table>
<thead>
<tr>
<th>Aspect of the Act/ definition</th>
<th>Examples of key elements of Act</th>
<th>Related areas of well-being, to support integration</th>
<th>Meeting the Act at a strategic level</th>
<th>Designing your proposal to support the intentions of the Act</th>
</tr>
</thead>
<tbody>
<tr>
<td>In working towards a more equal Wales we should be thinking of how we use spending strategically to reduce social, geographic and economic inequalities.</td>
<td>Role of cultural diversity in creating vibrant culture; relationship between health and inequality; need to develop skills and job opportunities in Wales.</td>
<td>How will this project be developed in a way that recognises the Public Sector Equality Duty and helps address inequalities and contribute towards a fairer society.</td>
<td>Is the project based in a place which is in priority need of investment? How does this link with issues highlighted by the well-being assessment for the area of your project? How will this project provide levers for reversing long-term disadvantage, and support disadvantaged groups in ways which are sustainable in the long-term? How have you identified and considered how the scheme will bring opportunity to areas of high multiple deprivation? Who benefits most from this project? For example, poorer people stand to benefit more from public transport, affordable energy, and public space and amenities. Who is negatively impacted - directly or indirectly - by this project? Are these impacts avoidable, and if not how could a suitable resolution be proposed? How will this project affect marginalised groups or groups with protected characteristics for example Black, Asian, Minority Ethnic people; Women; Lesbian, Gay, Bisexual, Transgender people; and Disabled people? A number of authorities have a legal obligation to conduct Equalities Impact Assessments as part of the Public Sector Equality Duty.</td>
<td></td>
</tr>
</tbody>
</table>
PART 3: Seven Well-being Goals

In working towards a more equal Wales we should be thinking of how we need to tackle the accumulation of wealth and power at the top which has failed to “trickle down”

Consider what affect a more equal dispersal of power and wealth could have on Wales’ options to tackle ecological degradation and greenhouse gas emissions, and support the development of a prosperous, geographically distributed economy?

Need to involve local people meaningfully (refer to “Involvement” under the Ways of Working Table above).

In working towards a more equal Wales we should be thinking of how we need to address poverty, lack of wealth and opportunities for those worst off in society, and promote equality of opportunity.

Consider the need to improve education and employment opportunities, tackling low pay, and aligning improvements in material conditions with sustainable lifestyles.

Need to improve education and employment opportunities; tackling low pay; and aligning improvements in material conditions with sustainable lifestyles.

How will this project ensure that decisions are made in a democratic and equal way, ensuring all voices and opinions are heard rather than allowing powerful voices to dominate?

Consider, for example, where decisions are made and which groups have access to decision-makers.

How will this project engage with social enterprises, co-operatives and employee-owned businesses in its supply chains?

How will this project add additional resources to areas of multiple deprivation, e.g. employment, public facilities to build social capital, quality infrastructure such as schools and healthcare?
### Cohesive Communities:

**Attractive, viable, safe and well-connected communities.**

In working towards **more viable communities** we should be thinking of how we need to be able to provide basic goods, services and jobs locally.

Consider how this can support low-carbon lifestyles, decent and local jobs, and attractive places to live.

In working towards a well-connected Wales we should be thinking about supporting people to be able to access local amenities which help communities connect to themselves, and provide good links to other parts of the country for recreation and internal tourism.

Consider the need for local jobs, local supply chains, opportunities to develop local arts, music, culture etc.

<table>

<td><strong>How can outdoor space, heritage sites and cultural activities provide opportunities for learning and recreation, vibrant and diverse local arts/music/culture?</strong></td>
<td><strong>How can local people be meaningfully consulted on their desires and needs for their area?</strong></td>
<td><strong>How will this project design these features in partnership with the community to meet their needs and desires for the area/spaces? This could include the design concept, the design of street furniture, and involvement of local artists as well as residents.</strong></td>
</tr>
<tr>
<td>Think also about the Ways of Working – in particular Involvement.</td>
<td><strong>How can outdoor space, heritage sites and cultural activities provide opportunities for learning and recreation, vibrant and diverse local arts/music/culture?</strong></td>
<td><strong>How can local people be meaningfully consulted on their desires and needs for their area?</strong></td>
<td><strong>How will this project improve the physical appeal of local spaces, whilst compensating for any potential negative impacts?</strong></td>
</tr>
</tbody>
</table>
## Vibrant Culture

A society that promotes and protects culture, heritage and the Welsh language, and which encourages people to participate in the arts, and sports and recreation.

### Aspect of the Act/definition

In working towards a **culturally vibrant Wales**, we should be thinking about how we support communities and ways of life that are sustainable, as part of a Wales where cultural diversity flourishes in a way that recognises and promotes the unique culture of Welsh communities and its language.

Consider the impacts of inequality on community viability, the ability of diverse groups to participate in cultural life, and other bodies (e.g. land use planning) who you can work with to support this goal.

### Examples of key elements of Act

- **Vibrant culture:** A society that promotes and protects culture, heritage and the Welsh language, and which encourages people to participate in the arts, and sports and recreation.

### Related areas of well-being, to support integration

- Impacts of inequality on community viability;
- The ability of diverse groups to participate in cultural life and;
- Other bodies (e.g. land use planning) who you can work with to support this goal.

### Meeting the Act at a strategic level

- How will this project contribute to a culturally vibrant Wales, recognising the potential direct and indirect impacts on Welsh communities and the Welsh language?

### Designing your proposal to support the intentions of the Act

- Consider the **direct impacts** of this project.

  - How will this project retain and enhance local cultural and language opportunities, e.g. providing new venues e.g. art/music/dance studios, sports facilities, arts festivals, museums/galleries, live music venues, cinemas), protecting and maintaining established ones; supporting local artists and traditional builders by involving them in the design of the project and new bits of public space.

  - How will this project ensure that these opportunities are accessible to all, e.g. affordable, public transport accessible, have disability access.

  - Consider the indirect impacts this project might have on the sustainability of local cultural diversity. This is about the behaviours that your project may trigger. For example, might it distort local housing markets by encouraging second home ownership? Or impact the viability of local facilities venues (consider those that cater to minority groups e.g. Lesbian, Gay, Bisexual, Transgender venues as well as more mainstream venues), or marginalise Welsh language? If so, what efforts will be taken to sustain vibrant culture, for example protecting cultural venues and facilities?
PART 3: Seven Well-being Goals

Vibrant culture:
A society that promotes and protects culture, heritage and the Welsh language, and which encourages people to participate in the arts, and sports and recreation.

In working towards a **culturally vibrant Wales** we should be thinking about how we support protection and enhancement of natural, cultural and historical heritage sites.

Consider the employment provided by heritage sites - particularly in rural areas - and the importance of equal access to heritage.

Employment provided by heritage sites - particularly in rural areas; importance of equal access to heritage.

How will this project contribute to a culturally vibrant Wales, recognising the potential direct and indirect impacts on Welsh communities and the Welsh language?

How will this project affect nearby natural or other heritage sites?

What impact does your project have on the overall landscape of the area?

How will this project increase accessibility of local heritage sites?

How will the project increase local access for all to arts, sports and recreational activities?

Can the scheme make extra investments which offer more arts, sports and recreational activities opportunities that are affordable and accessible to local people?

In working towards a **culturally vibrant Wales** we should be thinking about how we support arts, sports and recreation being locally available, accessible, and affordable.

Consider the importance of building social ties, flourishing diversity, and prosperous localities which can support lots of activities for a lively public life.

Importance of building social ties, flourishing diversity, and prosperous localities which can support lots of activities for a lively public life.

How will this project contribute to a culturally vibrant Wales, recognising the potential direct and indirect impacts on Welsh communities and the Welsh language?

How will this project affect nearby natural or other heritage sites?

What impact does your project have on the overall landscape of the area?

How will this project increase accessibility of local heritage sites?

How will the project increase local access for all to arts, sports and recreational activities?

Can the scheme make extra investments which offer more arts, sports and recreational activities opportunities that are affordable and accessible to local people?
### Globally responsible:

A globally responsible Wales. A nation which, when doing anything to improve the economic, social, environmental and cultural well-being of Wales, takes account of whether doing such a thing may make a positive contribution to global well-being and the capacity to adapt to change (for example climate change).

In working towards a **globally responsible Wales** we should be thinking about how we **support global well-being through sustainable consumption of resources, reduced greenhouse gas emissions, contributing to global knowledge on sustainability good practice and also developing and educating our own global citizens.**

Consider for example, the need for low-carbon economies and lifestyles, and proportionate use of resources, and understanding the impact of our own lifestyles on the rest of the world.

### Examples of key elements of Act

- Need for low-carbon economies and lifestyles; proportionate use of resources; and understanding the impact of our own lifestyles on the rest of the world.

### Related areas of well-being, to support integration

- How will this project offer global leadership or innovation in sustainable infrastructure?
- How can your project follow national or international innovative sustainable infrastructure models?
- How will this project contribute to a system where resources used and greenhouse gas emissions can be brought down?
- How has this project so far, and how will it continue to, build on best practice in sustainability from around the world?

### Meeting the Act at a strategic level

**Consider:**

- What Wales is bringing in from the rest of the world e.g. responsible purchasing (sustainable and ethical / Fairtrade sourcing, global supply chains); the volume of resources that Wales is consuming (both in the development of the project and the behaviours that it will induce).

And what Wales is putting out into the world based on our unique qualities e.g. developing sustainable, low-carbon technologies; providing a positive example of how infrastructure projects can integrate and promote wider well-being.

Overall, how is your project impacting the rest of the world - ecological footprint, reducing greenhouse gas emissions, both in its production and its use?
